- **Interchangeable extracting bulbs**
- **Two-year warranty**

Product Description

A commercial juicer that endures extended daily usage. It features a metal oscillating strainer to better separate the juice from the pulp so you get more juice from each piece of citrus. An operator can easily extract between 10-12 gallons of juice per hour using pre-cut citrus.

Comes with three extracting bulbs (one each for lemon/lime, orange and grapefruit). Our juicer weighs a hefty 31 pounds so it won't walk across the counter during use. Has a quiet yet heavy-duty motor for years of dependable, trouble-free operation. Housed in gleaming, chrome-plated steel. Dome, spout and bowl support are made of a strong corrosion-proof white plastic. All removable parts can be sanitized in the dishwasher for a quick and easy cleanup. Extremely safe to use, but not for use by children.

It is listed by Underwriters Laboratories, NSF International, CSA International, and VDE (Germany). Also approved for use in Europe. Two-year warranty.
