

ZERO

Quick-Milk

Coffee, hot water and milk
Capacitive user interface with Touch technology

Comfort and professionalism

Ergonomics and essentiality, versatility and ease of use: this is the Quick-Milk model of Egro ZERO. A compact super-automatic, especially designed for locations with medium-low daily consumption, which still want to offer their customers professional-quality espresso-based products. It optimises the use of the space available, according elegance and ease of use.

Versatile and multifunctional, Egro ZERO allows up to 16 different beverages to be programmed, and ensures that every cup is of the highest quality. Egro ZERO is equipped with an intuitive user interface. The backlit keypad can be activated by a simple touch. The button identifying the chosen product flashes during the entire brewing process – an attractive but also functional detail.

Egro ZERO has a highly professional milk system, allowing the user to brew a cappuccino or latte with a soft, dense crema. In the Quick-Milk version, the super-automatic can be fitted with the innovative Cool Box 6.5, an attractive, ergonomic cooling unit with a capacity of over 6 litres.

Egro ZERO has a dispensing spout with one of the largest movement ranges on the market, making this super-automatic suitable for the preparation of milk-based beverages in glasses up to 18 cm high, while at the same time ensuring perfect centring in the classic espresso cup.

Egro ZERO is particularly suited to self-service applications, thanks to its ease of use and its working area illuminated by LED lights, which ensure greater comfort and ease of use.

With the self-service version, the machine will be provided with a special locking kit for secure use.

● Standard ○ Optional – Not available

Power Saving. In full compliance with the European EuP directive (Energy-using Products), Egro ZERO ensures reduced energy consumption, thanks to the use of insulated boilers and consumption levels in standby mode of less than 0.5 W, with the aim of improving environmental performance throughout the product's life-cycle.

Dura-Brew. Egro ZERO is characterised by precise, reliable, innovative brewing technology. The patented brewing group in stainless steel displays a revolutionary hermetic closing system, which requires less maintenance and reduces overall operating costs.

USB Port. Easily accessible simply by opening the front panel, Egro ZERO is fitted with a USB port, which allows the technician to quickly check the machine's vital parameters and manage the functional data directly from a PC, for greater ergonomics and speed of use.
